What is BRTS System

Bhopal BRTS was a bus rapid transit system located in Bhopal, Madhya Pradesh, India, funded by the Central Government under its flagship JnNURM program. Unlike most BRT projects in India designed to serve suburban areas, Bhopal BRTS primarily catered to the needs of the Central Business Districts (CBDs). It launched in 2006 with a fleet of just 30 buses, following the JnNURM sanction, and expanded to 225 buses, including both AC and non-AC low-floor models. However, on December 26, 2023, the Government of Madhya Pradesh, led by Chief Minister Mohan Yadav, decided to discontinue the BRTS project due to traffic issues caused by the corridor. Instead, a central road divider was planned to separate traffic between the two lanes. The process of dismantling the corridor began on January 20, 2024.

How does the BRTS system work?

Bhopal's Bus Rapid Transit System (BRTS) is designed to enhance urban mobility by providing a fast, reliable, and eco-friendly public transport solution. Operating on dedicated bus lanes, the BRTS minimizes travel delays caused by traffic congestion, ensuring that passengers can commute efficiently across the city. With strategically placed bus stations featuring real-time information displays, pre-boarding ticketing, and comfortable waiting areas, the system prioritizes user convenience. Bhopal's BRTS also integrates with other modes of transport, allowing seamless transfers for passengers. Employing high-frequency services and environmentally friendly vehicles, such as electric and hybrid buses, the BRTS not only addresses the pressing need for efficient public transport but also contributes to reducing urban pollution. Designed with accessibility in mind, the BRTS is committed to serving all residents, making it a vital component of Bhopal's sustainable urban development strategy.

What are the main features of Bhopal's BRTS?

Bhopal's Bus Rapid Transit System (BRTS), known as MyBus, offers efficient public transportation through dedicated lanes that ensure faster movement and reduce congestion. The system integrates feeder buses to connect residential

areas with main routes, while its eco-friendly fleet includes low-floor, air-conditioned buses with accessibility features for people with disabilities. GPS-enabled buses are monitored centrally for punctuality, with priority at traffic signals to minimize delays. Overall, BRTS promotes sustainable urban mobility, making public transport faster, safer, and more reliable for Bhopal's residents.

What are the benefits of using the BRTS system?

The BRTS (Bus Rapid Transit System) offers numerous benefits, making urban transportation more efficient and sustainable. It provides dedicated bus lanes, ensuring faster and more reliable transit by avoiding regular traffic congestion. BRTS reduces travel time, encourages public transportation use, and helps lower carbon emissions by decreasing the reliance on private vehicles. Additionally, it offers affordable fares, making transportation accessible to a wider population. Features like smart ticketing, real-time tracking, and comfortable air-conditioned buses enhance the passenger experience. By promoting mass transit, BRTS also contributes to reduced road congestion, leading to improved air quality and a more organized urban environment.

Buses on the BRTS routes in Bhopal typically run at intervals of 15 to 20 minutes during peak hours and 30 to 40 minutes during off-peak hours.

What is the fare structure for the BRTS in Bhopal?

The fare structure for the Bhopal Bus Rapid Transit System (BRTS), follows a tiered system based on distance traveled. Typically, the minimum fare for a short distance journey starts around ₹10, and longer trips can cost up to ₹30 or more, depending on the route and bus type (such as AC or non-AC).

How can I purchase tickets for the BRTS?

You can purchase tickets for the BRTS in Bhopal directly on the bus from the ticket conductor (TT). The conductor will issue you a ticket based on your destination and the fare.

Are there any discounts available for students or senior citizens?

No, there are currently no discounts available for students or senior citizens on the BRTS system in Bhopal.

Is the BRTS system accessible for people with disabilities?

No, the Bhopal BRTS system currently lacks full accessibility features for people with disabilities. While some improvements may be in progress, the existing infrastructure does not comprehensively support access needs such as ramps, tactile paths, or dedicated seating on all routes and stations, limiting ease of use for individuals with mobility challenges or other disabilities.

What facilities are available at BRTS bus stations?

BRTS bus stations in Bhopal are equipped with seating areas, clear signboards, and shaded waiting spaces for passenger comfort. Ticket counters and automated machines facilitate easy ticket purchases, while CCTV cameras ensure security. Well-lit stations provide a safe environment, making travel more organized and accessible for all passengers.

Are there restrooms available at BRTS stations?

No, there are no restrooms available at BRTS stations in Bhopal. This lack of facilities can be inconvenient for passengers, especially during long wait times or for those with specific needs.
